

CANUSSA

MADE IN SPAIN

The new eco-design revolution

Make a difference.

Canussa is a premium eco-design accessories brand that produces with the best and most innovative materials, designed and manufactured in Spain by artisans who make each piece unique.

A hallmark? The **durability** and **resistance** of the accessories, which, in addition to being stylish, are sustainable and vegan, and maintain the same appearance from day one as time goes by.

Each Canussa accessory is filled with values and meets the highest standards of social and environmental impact validated by the renowned **B Corp** certification.

WE MERGE:

functionality and **design**

The new eco-design revolution

— The new eco-design revolution —

Fabrics

EXTERIOR

High-resistance vegan alternative to leather.

For the exterior of our accessories, we use a high-resistance microfiber that replicates the characteristics of natural cowhide leather. It is a waterproof, washable, lightweight, and highly durable material, even against chemical agents.

The microfiber is certified with the Oeko-Tex® Standard 100 class I label, the most widely used ecological label in the world, ensuring that labelled textile products have been tested for more than 300 harmful substances, affirming that it is free from harmful agents to health.

Fabrics

OUR LINING

For the interior of our accessories, we use a high-quality textile made from recycled PET with Global Recycled Standard (**GRS**) certification.

PACKAGING

Our bags are delivered with a protective bag made in Spain from recycled cotton. **All our suppliers are local.**

move

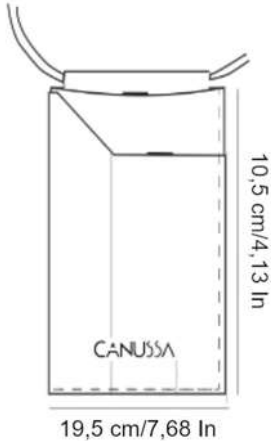

The new eco-design revolution

MOVE

This mobile phone case is versatile and modern. Suitable for the vast majority of models, it features two slots for multiple cards and a long strap to comfortably **carry it everywhere**. Resistant to light, water, and tear, this case is a smart protection for your mobile phone.

COLORS

Black and yellow

02.

Closet

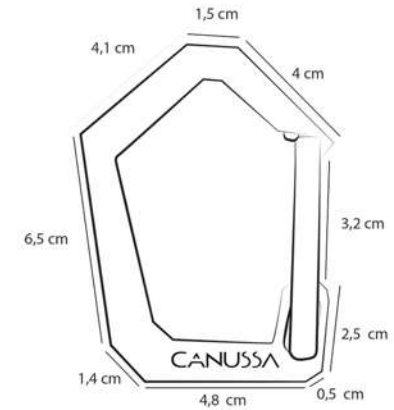

The new eco-design revolution

BAG HOOK

Our Closset is a hanger made from waste and bags that have reached the end of their useful life and would normally end up in a landfill. At Canussa, we give them a second life by turning them into an **essential accessory** that can be used as a hanger or hook for any flat surface or as a padlock.

COLORS

Variable depending on waste

03.

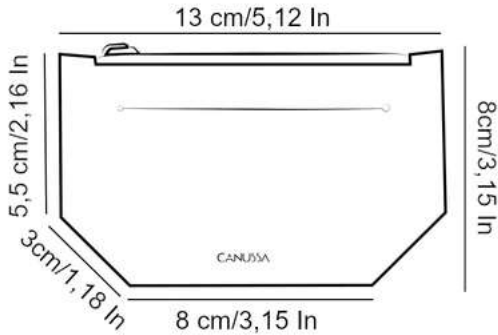

Minimal purse

MINIMAL PURSE

This genderless wallet and cardholder has been designed to carry bills and coins along with the **most important cards**. Ideal for having the essentials at all times.

UP-CYCLING

This **backpack** is made of one upcycled airbag and three upcycled seatbelts recovered from the car scrapping, with our high resistant and waterproof microfiber, and with 100% recycled pet GRS certified lining.

We are working to become a **circular fashion brand** with circular products and materials, using recycled textiles where possible, extending the lifetime of our products. We are currently working on regenerating our products at the end of their life creating a hanger with these old textiles.

CIRCULAR FASHION

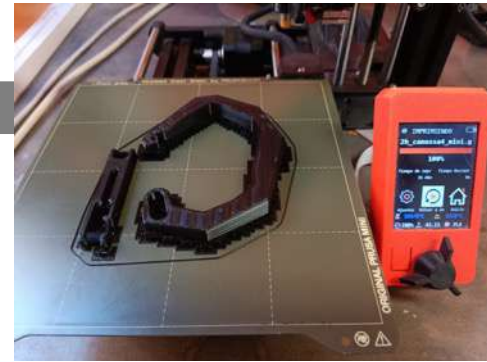

ECO-DESIGN

We are creating new products based on **ecodesign**. This means that we are working to make our bags ecodesigned with few seams and free of trims. This would allow them to be fully recyclable.

3D printing allows us to generate zero waste during the production process, while also bringing us closer to **on-demand** fashion, thereby reducing our carbon footprint.
